REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The closest prior art was found to be Yamada et al (US 6,312,759).
2. Yamada provides a general teaching of the use of fluorinate cyclopentanes and their combination with various other solvents to form azeotropic mixtures. Yamada however fails to teach or suggest the specific azeotropic composition containing the fluorocyclopentane and the bromopropane. Furthermore, Yamada does not provide the requisite degree of teaching which would motivate one skilled in the art of chemistry to substitute the solvents taught for the required bromopropane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
